PROFESSIONAL SUMMARY

Junior analyst in Cloud & Information Security, with hands-on experience in the AWS ecosystem. Independent contractor since January 2026, building secure environments from the ground up (Security by Design), with IaC in Terraform, access governance via IAM, and automated auditing and FinOps practices. Currently pursuing a degree in Information Security, with the AWS Cloud Practitioner (CLF-C02) certification in preparation.

PROFESSIONAL EXPERIENCE

Cloud & DevSecOps Analyst (Independent Contractor)

Specialized Services / Independent Consulting · Jan 2026 - Present

- Provisioning on-demand AWS environments with Terraform (VPCs, subnets, security groups), ensuring security from the design phase.
- Access governance via IAM/RBAC following the Principle of Least Privilege, with continuous auditing in CloudTrail and CloudWatch.
- CI/CD pipelines with GitHub Actions integrating AWS Secrets Manager, eliminating key exposure in deploys.
- Applying FinOps practices: automatic shutdown of idle resources and cost-center tagging.

TECHNICAL SKILLS

Cloud & Security: AWS (EC2, S3, IAM, VPC, Route53, Lambda, EventBridge, SNS), CloudTrail, CloudWatch, KMS, GuardDuty, MFA

DevOps & Automation: Terraform (IaC), GitHub Actions (CI/CD), AWS CLI, Linux (Ubuntu/Amazon Linux)

Languages & Back-End: Java, Python, Spring Boot, Spring AI

Data & Integrations: SQLite, BeautifulSoup4, pyTelegramBotAPI, Ollama, Vosk, eSpeak-NG

EDUCATION

Bachelor of Technology in Information Security

Cruzeiro do Sul Virtual · Jan 2026 - Dec 2027 (in progress)

Certifications: AWS Certified Cloud Practitioner (CLF-C02) — in preparation (SimuLearn) · Introduction to Terraform (HashiCorp Labs)

LANGUAGES

Portuguese: native | English: intermediate

PROJECTS

CloudGuard: Automated Governance & FinOps

Event-driven governance platform that automatically detects and blocks publicly exposed S3 buckets, flags resources missing cost-center tags, and shuts down idle resources in test environments.

Terraform · AWS Lambda (Python) · EventBridge · CloudTrail

CloudGuard: Threat Detection & Incident Response

Hardened infrastructure (no SSH, mandatory IMDSv2) with GuardDuty and CloudTrail for threat detection, and a Lambda triggered by EventBridge to automatically isolate compromised instances within seconds.

Terraform · GuardDuty · Lambda · EventBridge · SSM/IMDSv2

CI/CD DevSecOps Pipeline with Secrets Management

Deployment pipeline with GitHub Actions and Terraform that completely eliminates access key exposure in source code via AWS Secrets Manager, provisioning VPC, IAM, and S3 under least privilege.

GitHub Actions · Terraform · AWS Secrets Manager · IAM

Cost Monitoring & Continuous Auditing

Auditing pipeline with CloudTrail, an S3 log vault, and a CloudWatch billing alarm with email notifications via SNS when costs exceed a defined threshold.

Terraform · CloudTrail · CloudWatch · SNS

Finance AI Voice API — 100% Free & Local Edition

Voice-controlled personal finance budgeting API, running 100% local and offline (Ollama for chat with Tool Calling, Vosk for transcription, eSpeak-NG for synthesis), eliminating recurring costs from paid AI APIs.

Java · Spring Boot · Spring AI · Ollama · Vosk · eSpeak-NG

Job Hunter Pro — Telegram Bot

Bot that aggregates listings from multiple job sites (Vagas.com, Indeed, InfoJobs, Catho) in real time on Telegram, with a precision filter, IP-based geolocation, and local caching for instant responses.

Python · pyTelegramBotAPI · BeautifulSoup4 · SQLite
