PROFESSIONAL SUMMARY

Back-end developer with 2 years of experience in Python, AI, and automation. Researcher at Unisinos in partnership with Dell, focused on LLM agent observability with LangChain and OpenTelemetry. Cofounder of Servidor dos Programadores, one of the six largest dev communities in Brazil on Discord (18k+ members). Fluent in English.

PROFESSIONAL EXPERIENCE

Researcher — AI Agents & Observability

Unisinos / Dell Technologies

Jun 2026 - Present · Remote

- Researching observability patterns for multi-agent systems: how to trace behavior, latency, and failures of AI agents in production, including tool calls, agent handoffs, and context propagation.
- Delivered a comparative study of 6 embedding-clustering pipelines (K-Means, UMAP, PaCMAP, LocalMAP, densMAP + HDBSCAN) on real support-ticket data, with statistical validation (trustworthiness, DBCV), informing the team's approach to automatic topic discovery.

Cofounder & Back-End Developer

Servidor dos Programadores

Jun 2022 - Present · Remote

- Built Python and Discord.py bots that automated welcomes and technical support, improving retention and reducing the team's manual work.
- Set up CI/CD pipelines with GitHub Actions that test and ship updates on every push, eliminating manual deploys.
- Led the organization of technical events with sponsors like Alura, Shard Cloud, and Hostinger for 18k+ developers.

TECHNICAL SKILLS

Languages: Python, Java, C, C++, JavaScript, SQL

AI & Agents: LangChain, LangGraph, LCEL, RAG, LLMs, scikit-learn

Observability & DevOps: OpenTelemetry, Jaeger, Grafana, Agent Tracing, Docker, GitHub Actions, CI/CD, Git, Linux

Frameworks & Data: Spring Boot, Django, Flask, Discord.py, MySQL, JPA / Hibernate

EDUCATION

B.Sc. in Computer Science

Universidade do Vale do Rio dos Sinos (Unisinos)

Feb 2026 - Present · São Leopoldo, Brazil · Lattes: lattes.cnpq.br/8608406696939587

LANGUAGES

Portuguese: native | English: fluent (C1) | Spanish: intermediate (B1)

PROJECTS

AI Technical Support Agent

Autonomous Python agent powered by GPT-4o that interprets first-line support tickets and returns contextual resolutions through RESTful APIs, with no human escalation.

Python · LLMs · OpenAI GPT-4o · RESTful APIs | github.com/righibe/technical-suport-Agent

CI/CD Pipeline in Python

Complete pipeline with GitHub Actions and Docker: automated tests on every push and a container deploy only when everything passes, eliminating manual deploys.

Python · GitHub Actions · Docker · Flask | github.com/righibe/ci-cd-pipeline-python

Generative AI Discord Bot

Discord.py bot integrated with an open-source generative AI API, handling multi-turn conversation context for 18k+ community members in real time.

Python · Discord.py · Open-source LLM API | github.com/righibe/bot-discord-IAgenerativa
